

SMK SERIES TOUCHSCREEN PEDESTAL

SPECIFICALLY DESIGNED FOR MOUNTING TOUCHSCREENS AND SCREENS UP TO 42", THE INDOOR PEDESTAL RANGE IS ROBUST, AND AESTHETICALLY DESIGNED, WITHOUT COMPROMISING FUNCTIONALITY.

Enclosures are manufactured from mild steel with a brushed stainless steel outer skin, and access doors. A powder coated option is available (colour optional), giving durability and protection.

All units can be provided with illuminated and branded side panels for that distinctive, quality look. (LED light arrays are colour selectable by infrared controller)

The pedestal is fitted with an access door incorporating a 2 point lock system that secures into the body of the housing, revealing an adjustable shelving rack and cable management system.

The pedestal can accept screens up to 32Kg and has an adaptor plate to permit most VESA mounts from 100mm, 200mm and 400mm pitches. The screen mounting system permits variable tilt options from horizontal to 45 degrees.

SMK
